

Scarborough Subway Extension

The Scarborough Subway Extension will bring the TTC's Line 2 subway nearly eight kilometres farther into Scarborough. It will extend from Kennedy Station to Sheppard Avenue and McCowan Road, providing quick and seamless transit for those heading into and out of the downtown core and those travelling within Scarborough.

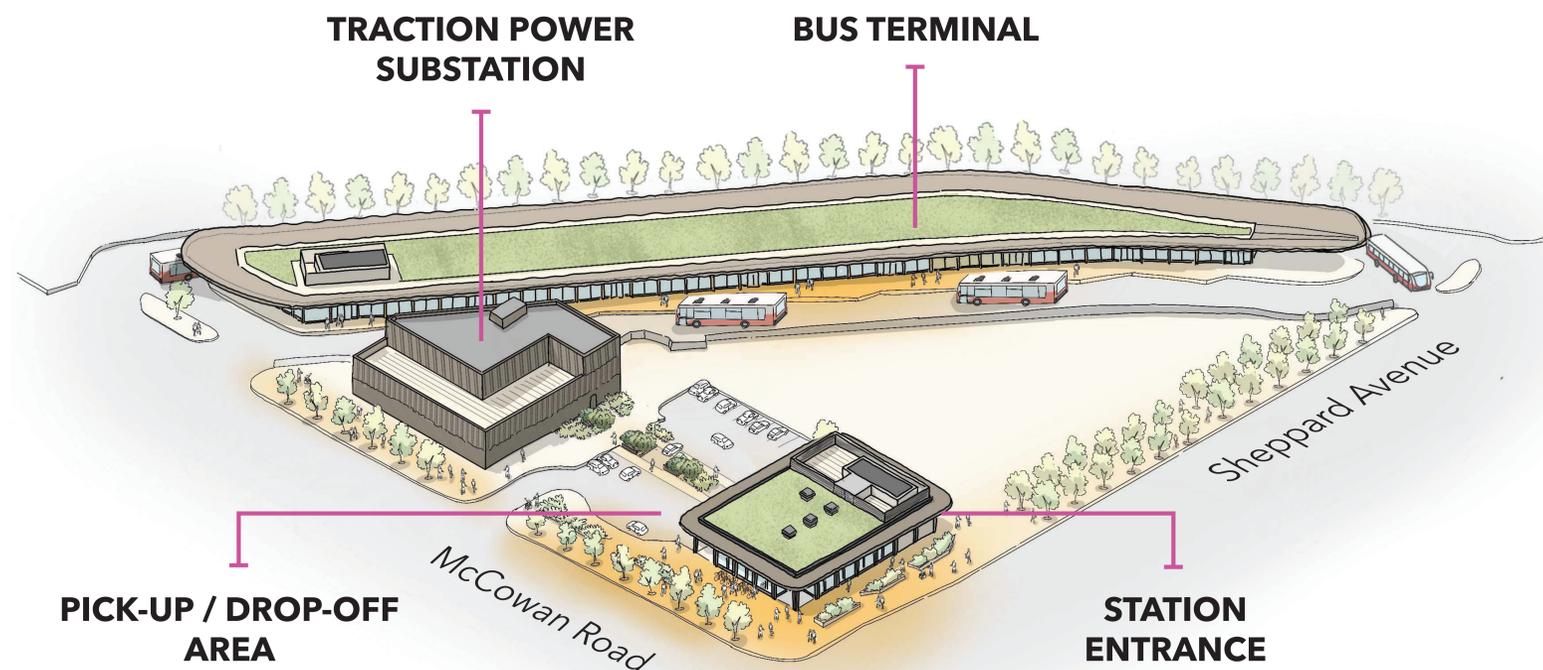

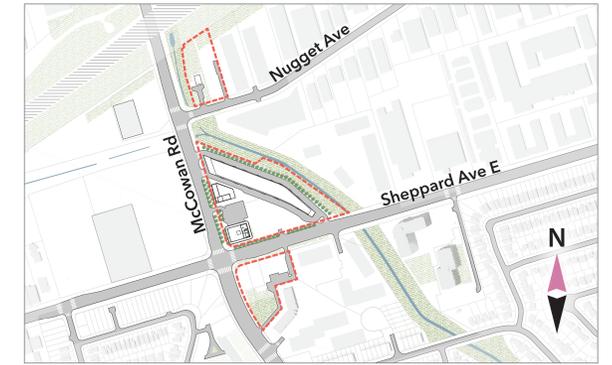

There will be 3 new stations along the alignment:

- Sheppard and McCowan
 - Scarborough Centre
 - Lawrence and McCowan
- Approximate length: 7.8 km
 - Anticipated boardings: 105,000 daily boardings
 - Access to transit: 38,000 more people within walking distance to transit
 - Access to jobs: More than 34,000 jobs within a 10-minute walk from a new station

Sheppard and McCowan station

Sheppard Avenue and McCowan Road

*Design is conceptual. All renderings are illustrative and subject to change, and do not include potential transit-oriented community proposals.

- Will bring direct access to rapid transit to customers who live and work north of Highway 401.
- Will feature a bus terminal with passenger pick-up and drop-off facilities.
- Customers in the northern part of Scarborough will spend less time on buses to travel downtown, with a transfer at this station instead of Scarborough Centre.

Key facts

13,230 customers expected to use the station during busiest hour

12,000 transfers expected during busiest hour

5,995 jobs expected in the area

Forecast for 2041. Includes proposed Line 4 forecasting.

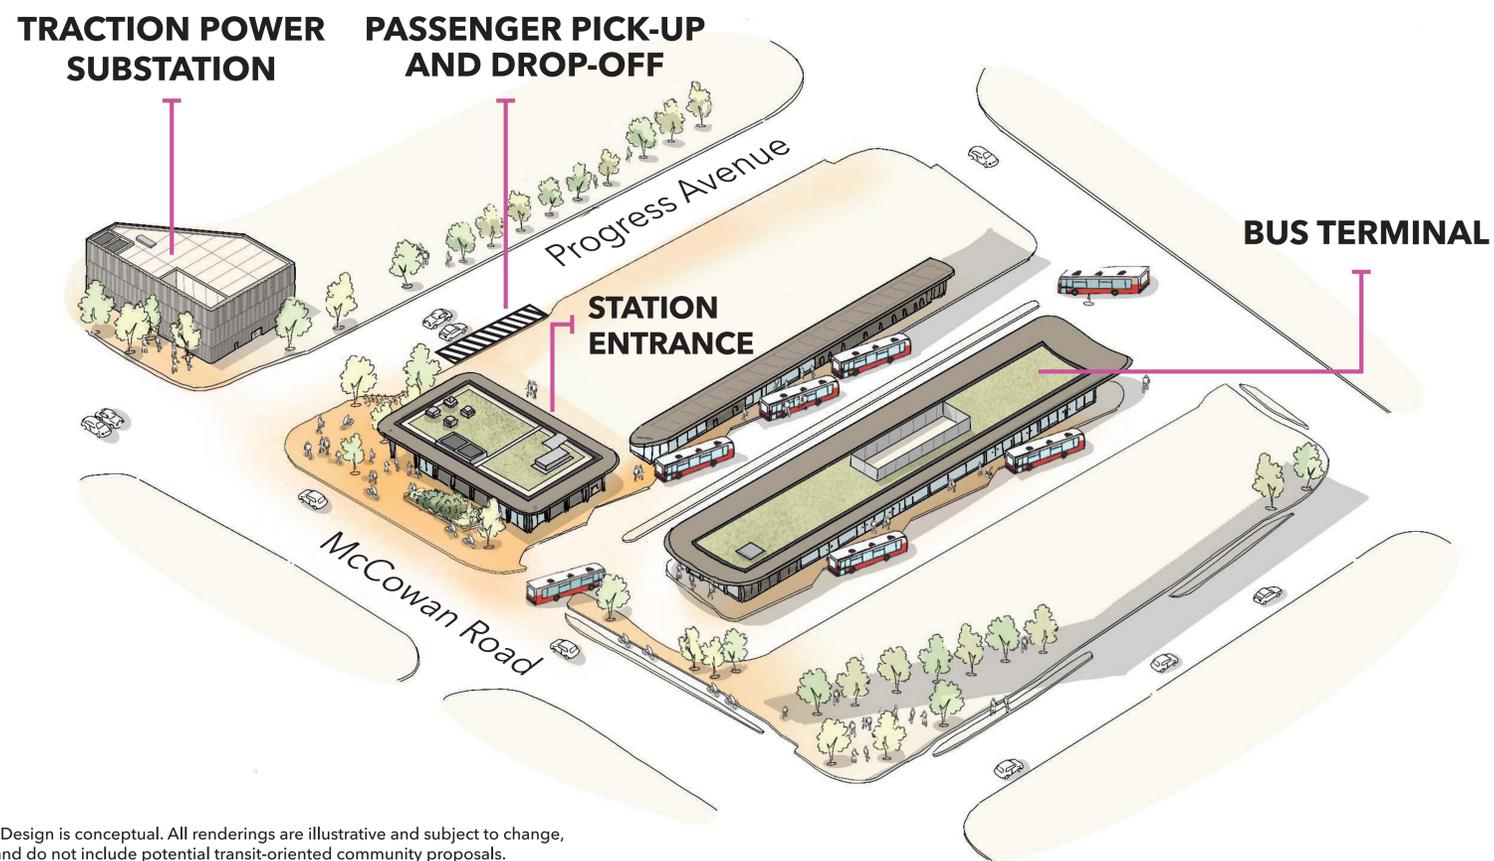

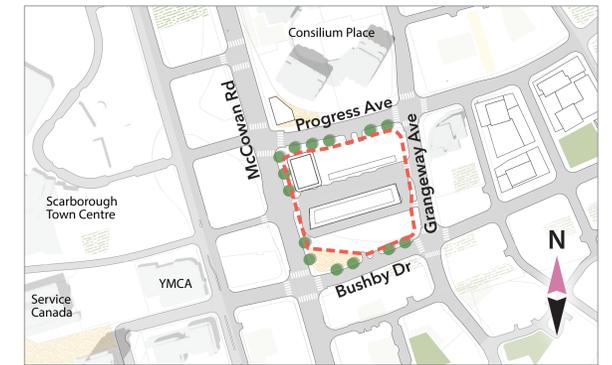

SHEPPARD AND McCOWAN STATION

Design is conceptual. All renderings are illustrative and subject to change.

Scarborough Centre station

McCowan Road and Progress Avenue

*Design is conceptual. All renderings are illustrative and subject to change, and do not include potential transit-oriented community proposals.

- Will improve bus connections and travel times for almost 30,000 students and staff at Centennial College's Progress Campus and the University of Toronto's Scarborough Campus.
- Transfers between regional and local transit and the subway line will be convenient and reliable.
- Will feature a new bus terminal with passenger pick-up and drop-off facilities.

Key facts

10,220 customers expected to use the station during busiest hour

7,340 transfers expected during busiest hour

25,980 jobs expected in the area

Forecast for 2041. Includes proposed Line 4 forecasting.

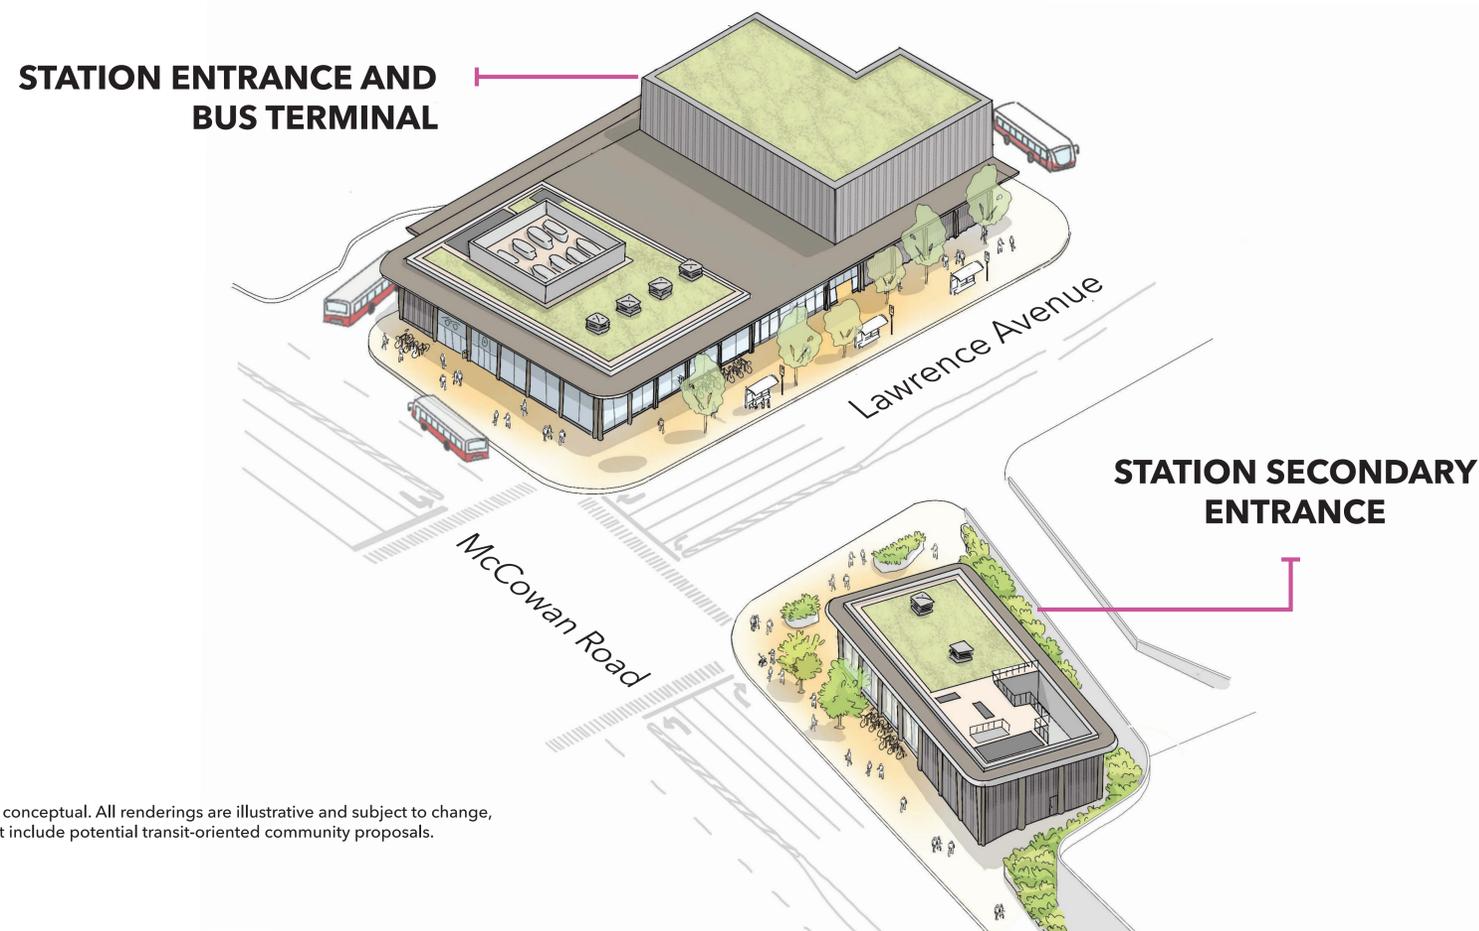

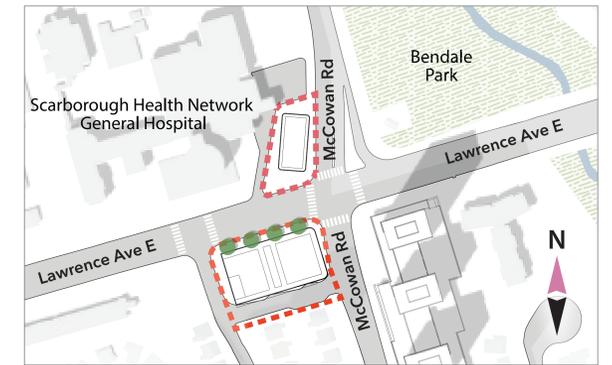

SCARBOROUGH CENTRE STATION

Design is conceptual. All renderings are illustrative and subject to change.

Lawrence and McCowan station

Lawrence Avenue East and McCowan Road

*Design is conceptual. All renderings are illustrative and subject to change, and do not include potential transit-oriented community proposals.

- A seamless subway connection will provide improved access to both healthcare and employment opportunities at the Scarborough Health Network General Hospital.
- Will feature a new bus terminal with connections to express bus service on Lawrence Avenue.

Key facts

5,290 customers using the station during the busiest hour

4,480 transfers during busiest hour

3,470 jobs in the area

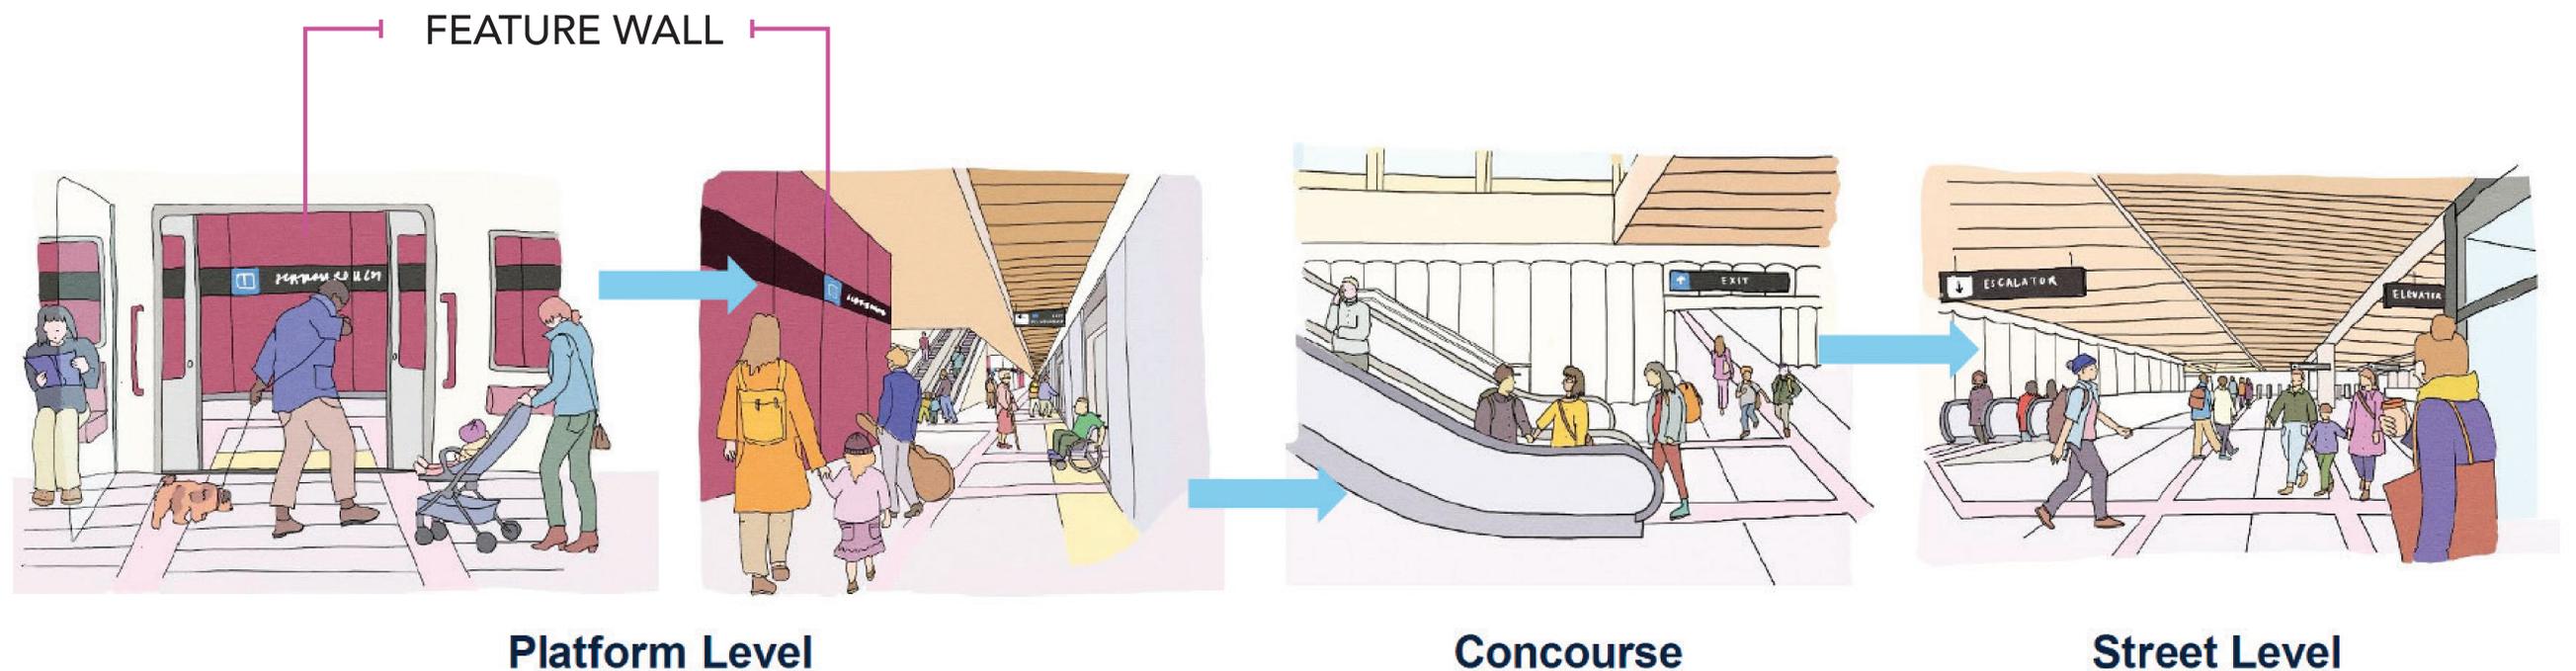

Forecast for 2041. Includes proposed Line 4 forecasting.

LAWRENCE AND McCOWAN STATION

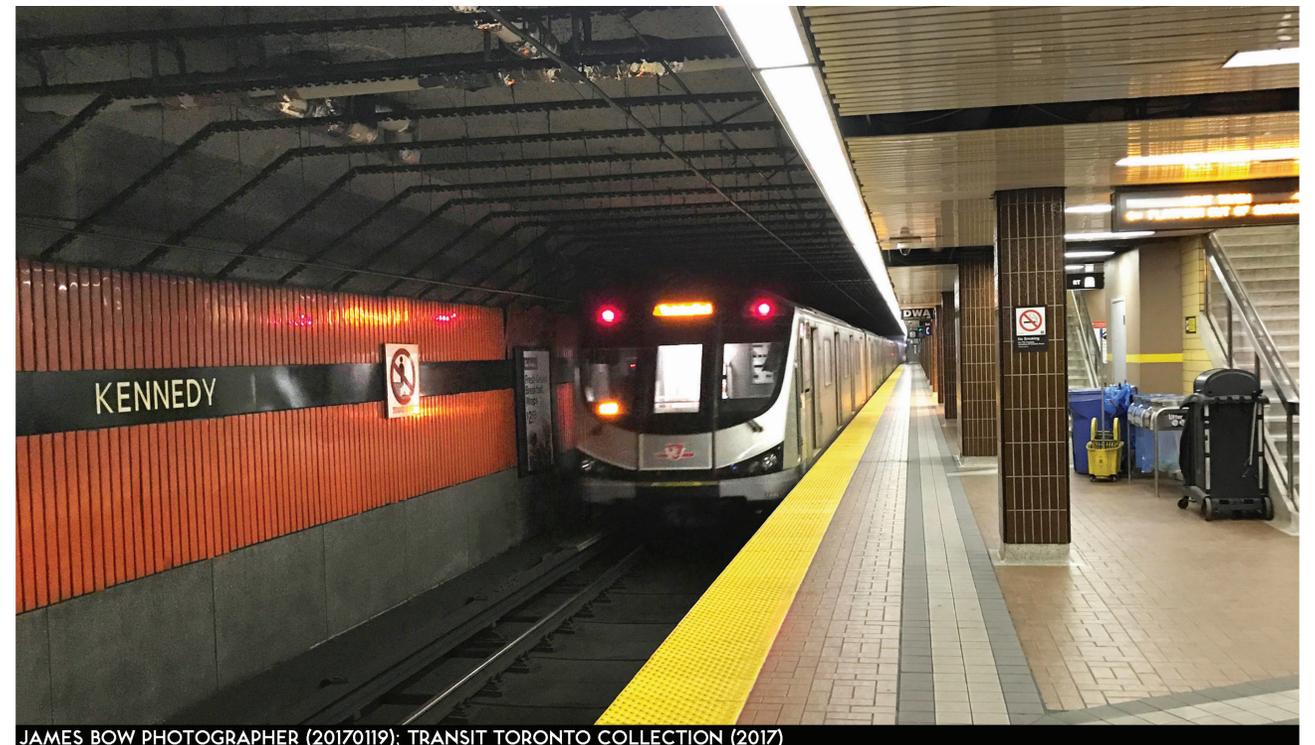

Design is conceptual. All renderings are illustrative and subject to change.

What is a Feature Wall?

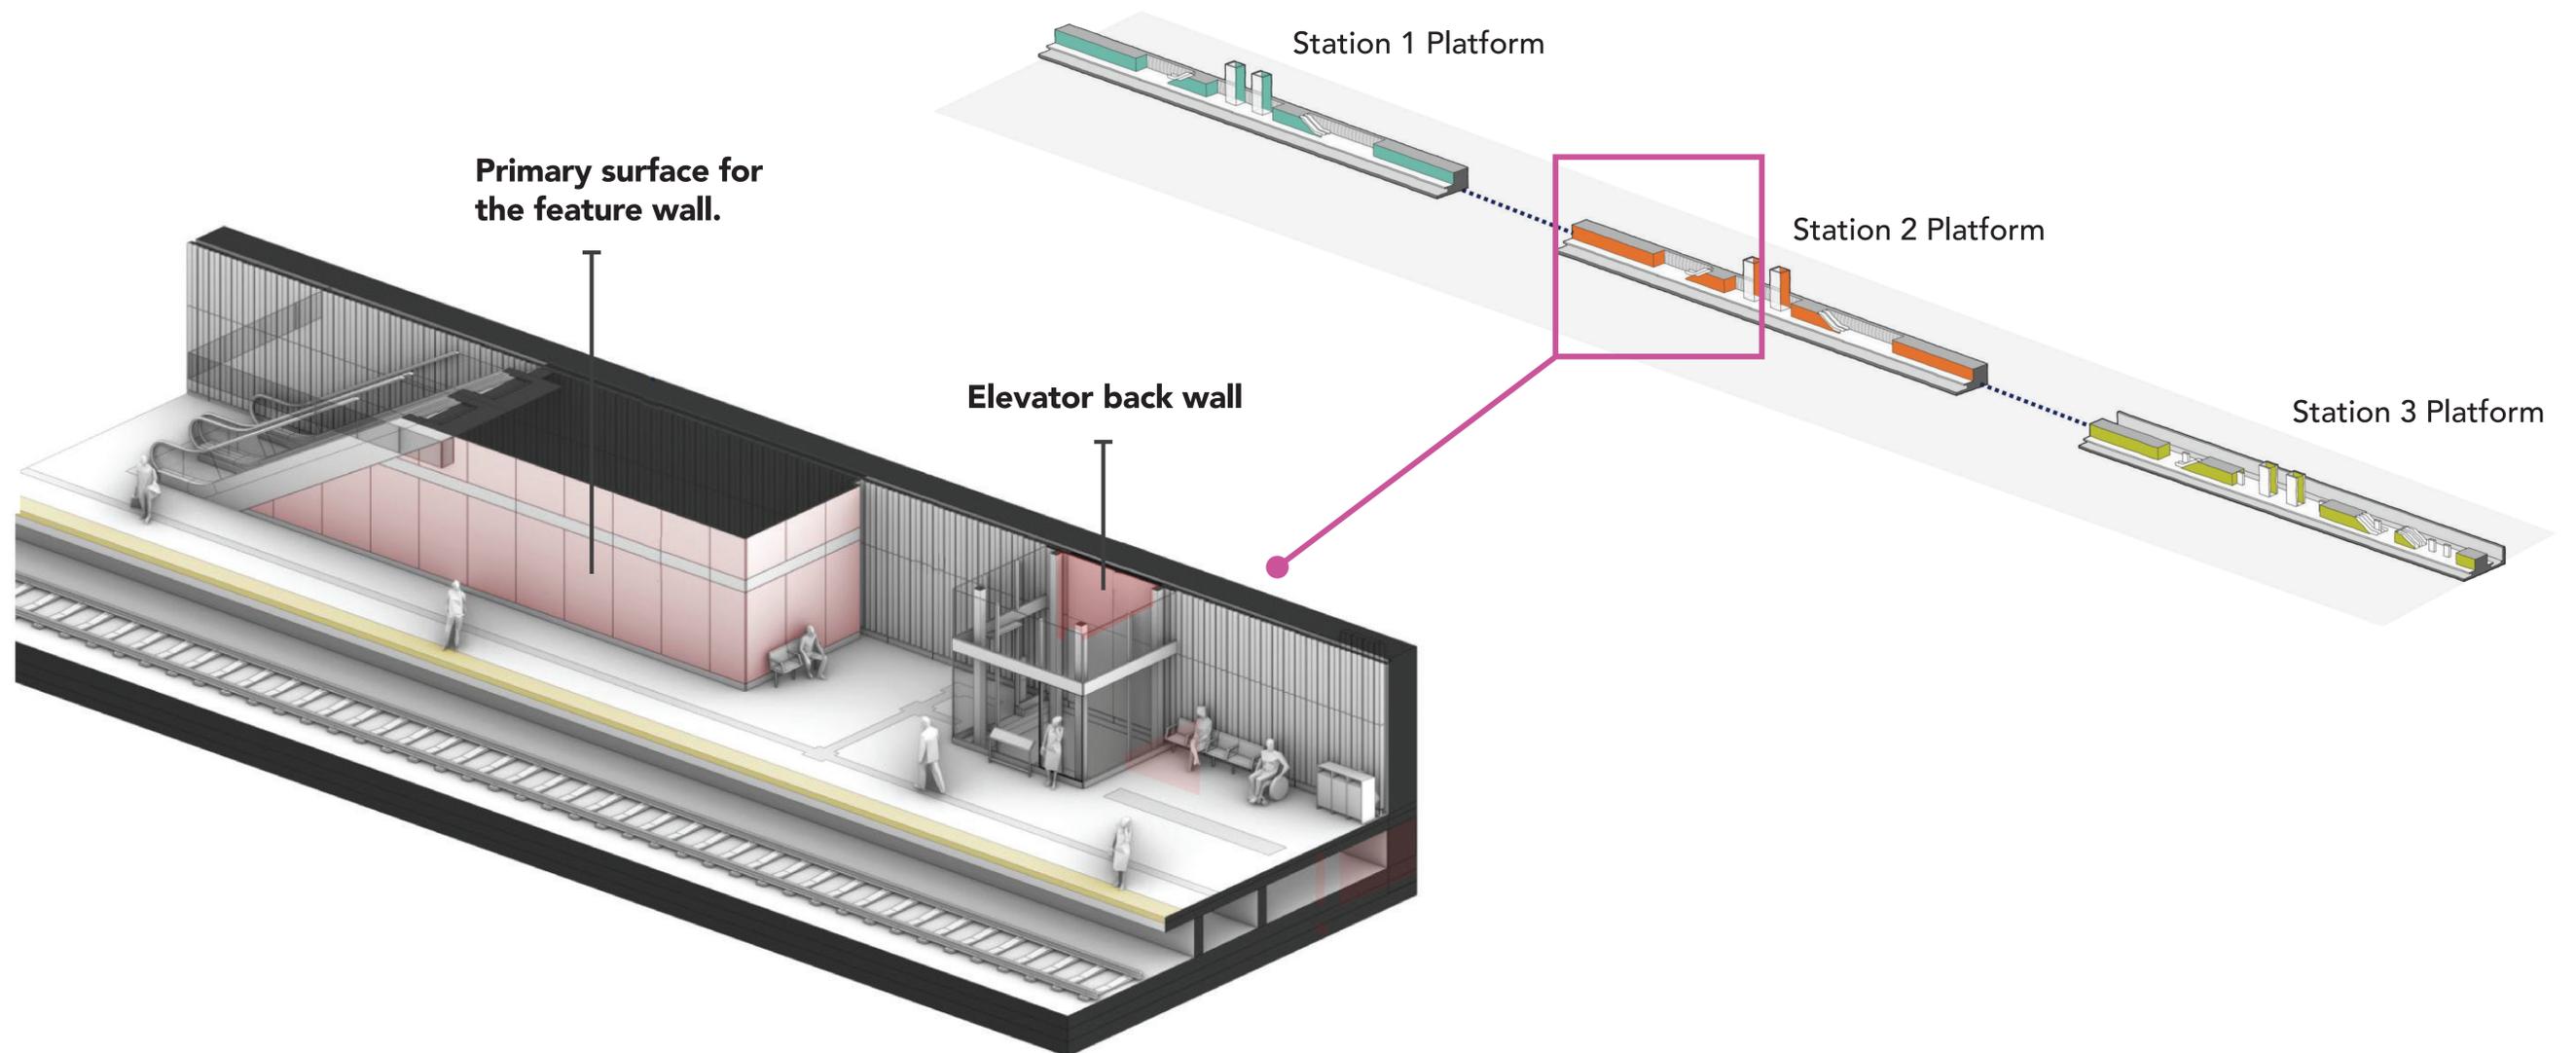

Feature walls are prominent surfaces within the station environment made up of a colour and pattern unique to each station. They help riders orient themselves along the line and identify their station easily.

TTC Line 2: Existing Feature Walls

Feature walls with colours and patterns are used at existing Line 2 TTC stations to help riders easily recognize their station from the train.

Feature Wall Systems and Materials

The new stations along the Scarborough Subway Extension will have feature walls along the platforms, each with a unique visual identity using colours, motifs and patterns. The feature walls are being designed to allow for a range of colours and patterns that complement surrounding materials, while also considering modularity, durability and maintenance.

How you inspired us

Consultation Open Houses

Further Design Refinement

In January 2024, we held an online consultation, asking you to help us draw inspiration from the places and things you love about your community. Thousands of you responded to the survey and your feedback helped us capture the most cherished natural, historic and cultural characteristics of Scarborough.

Here's what you told us! These elements will inform the designs for the new station feature walls.

Your feedback helped us develop two themes for feature walls

Theme 1:

**Bustling
Scarborough
Surrounded
by Nature**

With a mixture of big city landmarks and beautiful parks and landscapes, this theme highlights the interconnection between urban living and nature unique to Scarborough.

Theme 2:

**Vibrant
and Diverse
Scarborough**

Scarborough is an exciting and diverse place to live, and this theme highlights the different cultures and influences that make Scarborough home.

Theme 1:

Bustling Scarborough Surrounded by Nature

Rouge National Urban Park

Scarborough Bluffs

Surrounded by Nature**

DO YOU LIKE THIS COLOUR THEME?

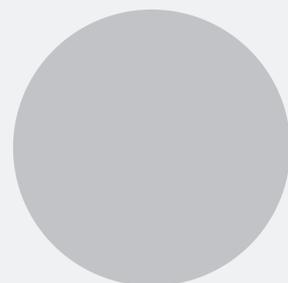

The feature walls will be a variation on a line wide theme, meaning the colours you see below will be applied across all three station platforms with variations in colour, pattern and motifs. Give us your feedback below by placing a sticker to represent how much you like the Theme 1 colours.

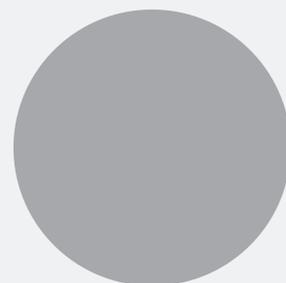

Below are examples of how the colours might be applied across all three station platforms.

Two tiling patterns were developed inspired by local geography and geologies

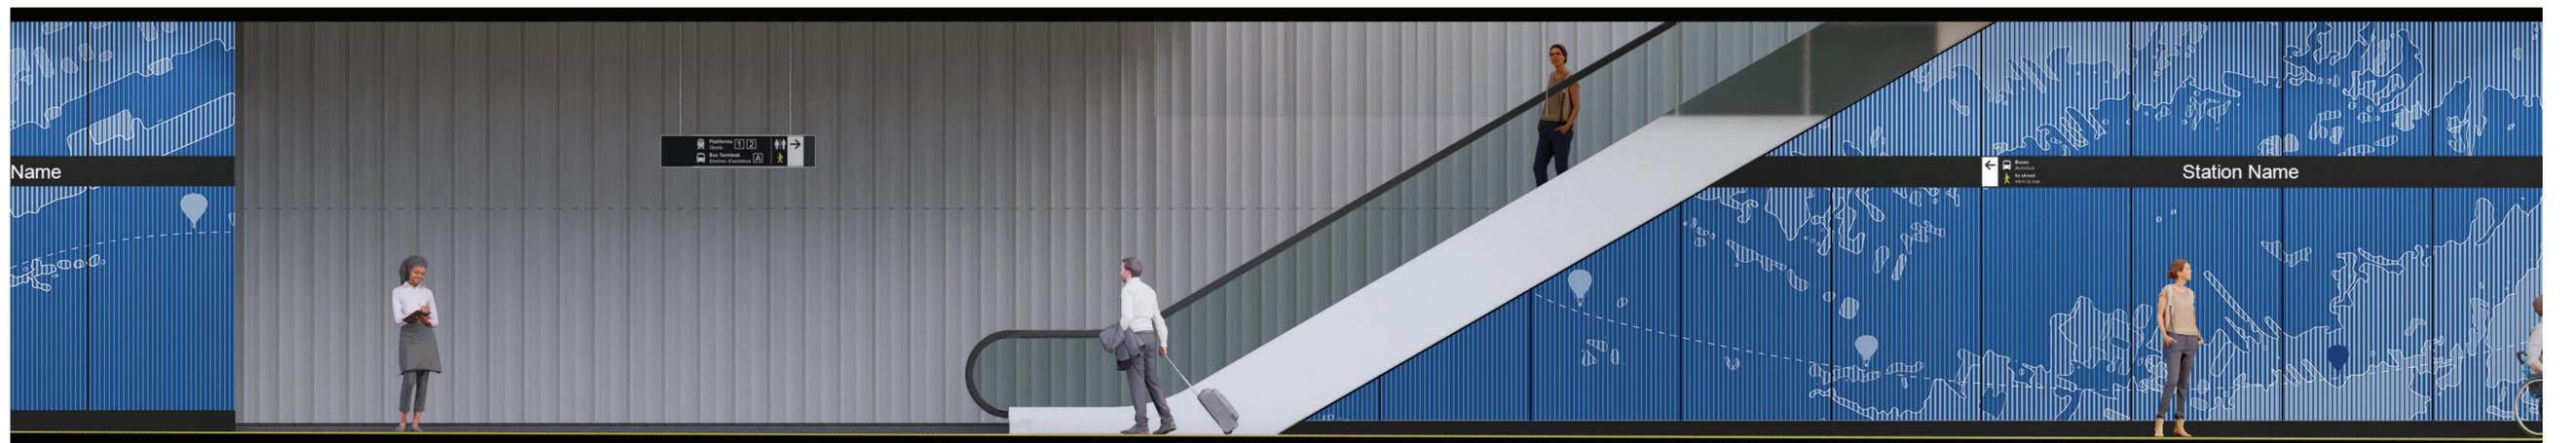

Pattern 1:

Inspired by local geological patterns - layers of sediment and rock.

Pattern 2:

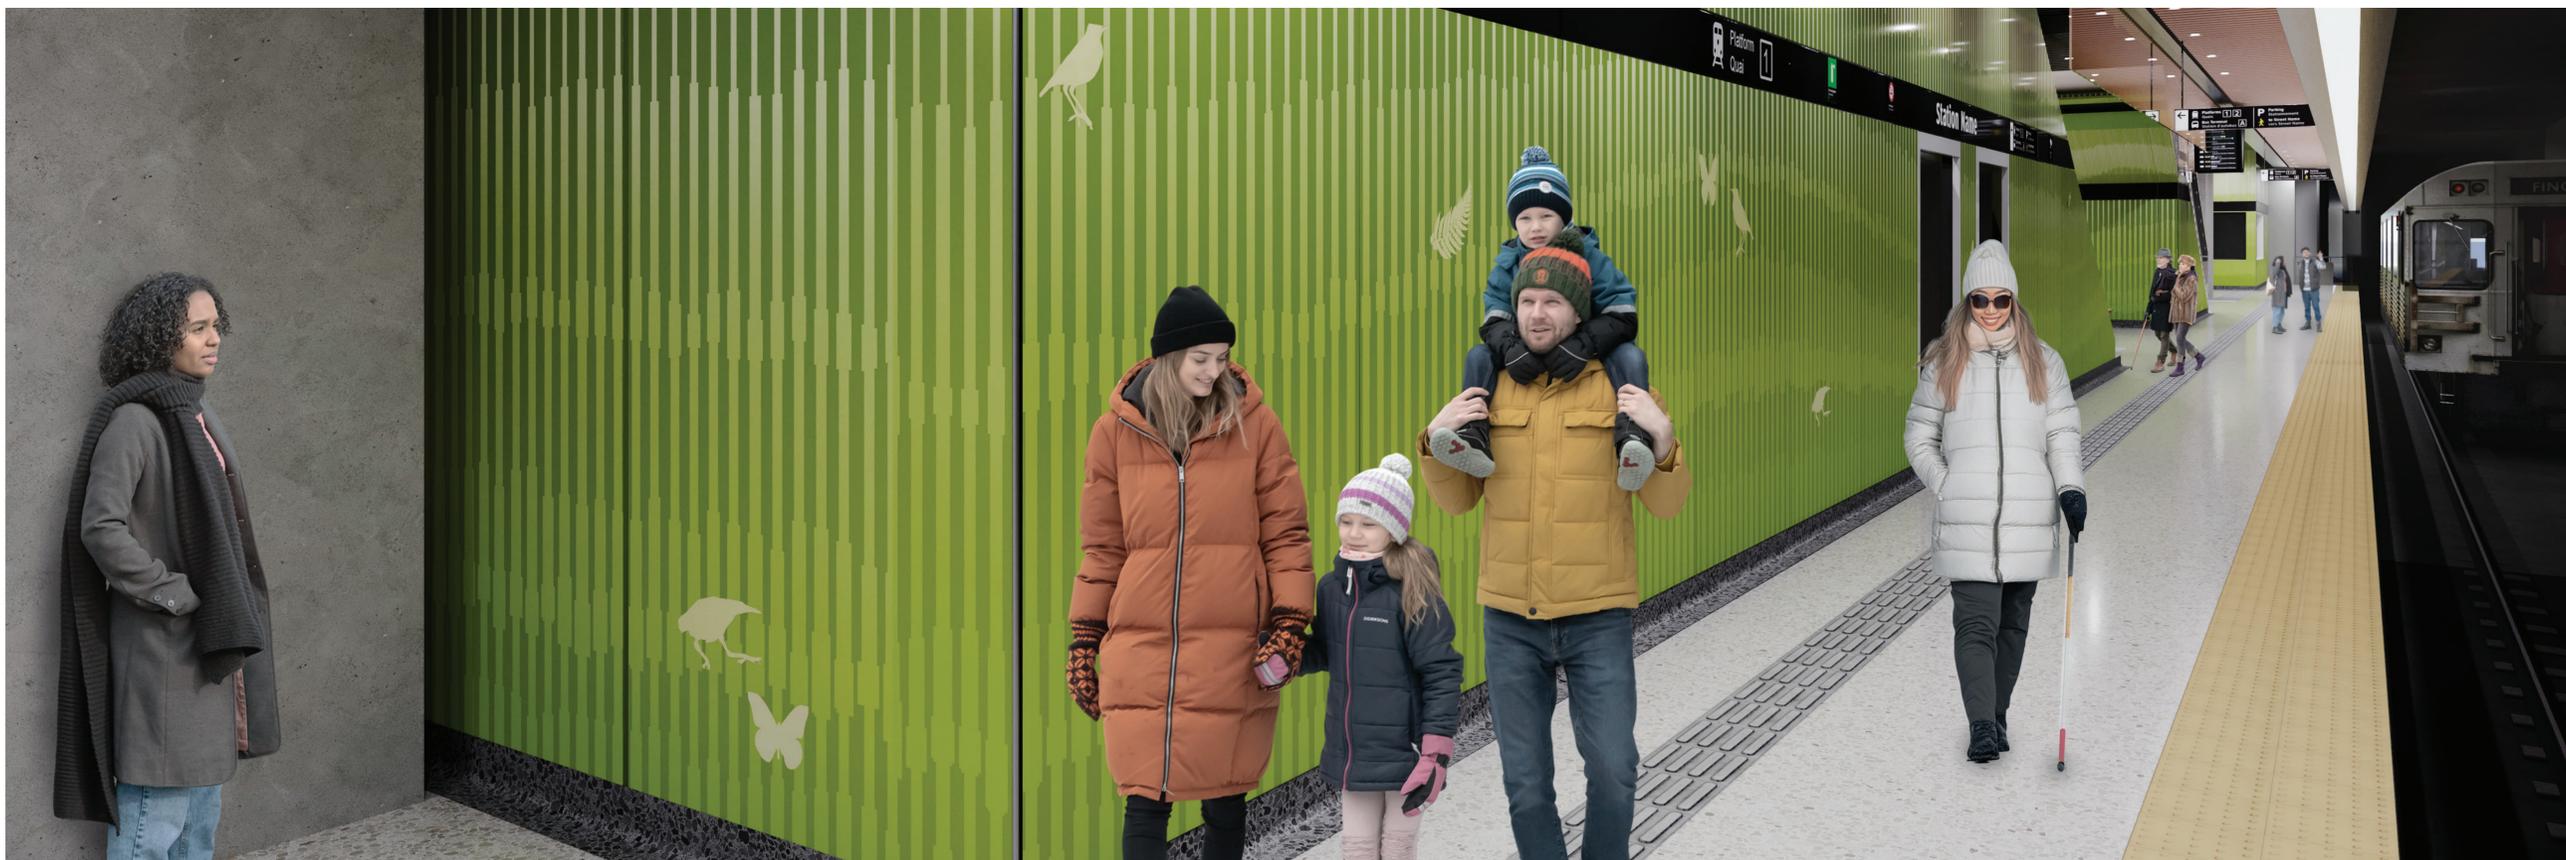

Inspired by local topography - aerial view of land surface.

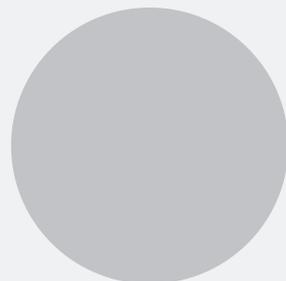

They run across the length of the platform and help draw riders towards stairs and escalators.
