

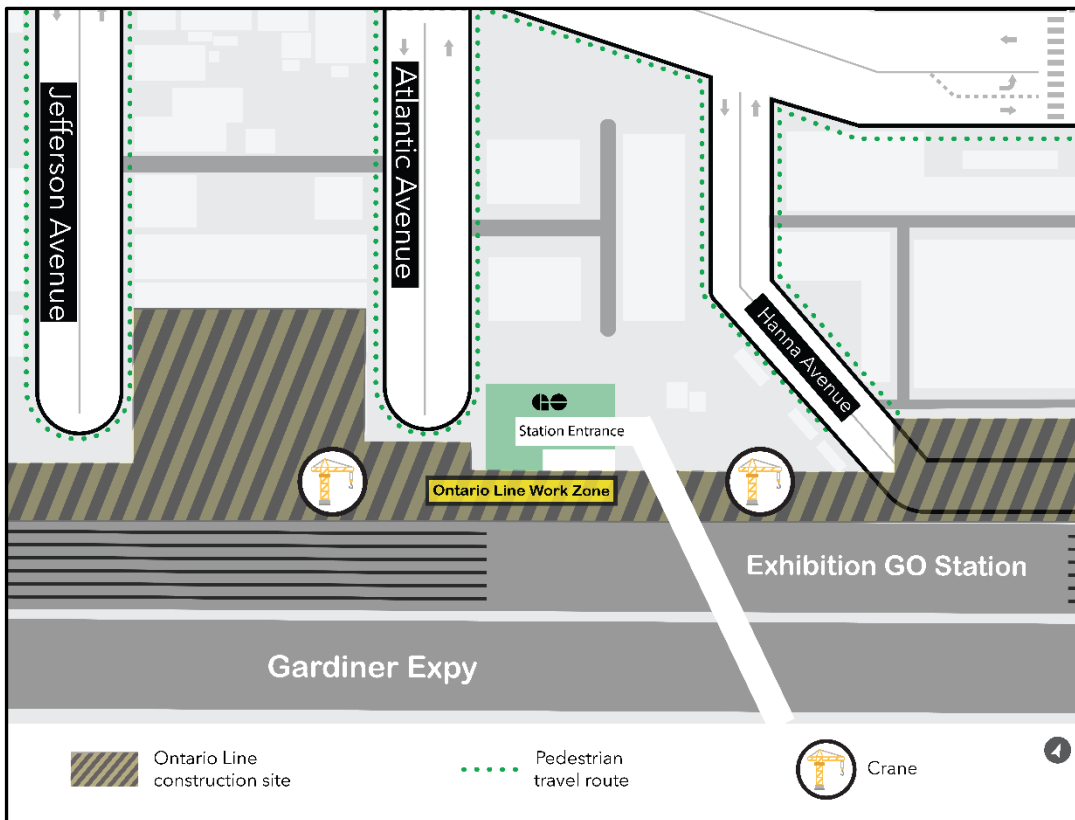

Exhibition Station tower crane installations

Expected start date: As early as June 25, 2025

Expected duration: Through the end of August 2025

Hours of work: Weekdays and Saturdays as needed, 7:00 a.m. to 11:00 p.m.

Map of work area:

What is happening?

Starting as early as **Wednesday June 25, 2025**, installation process will begin for the first of two new tower cranes within the Ontario Line work zone at Exhibition Station.

The first crane will be installed between Atlantic Avenue and Jefferson Avenue at the southern end of Liberty Village. The second crane will be installed east of the GO Exhibition pedestrian bridge. As illustrated on the map, both cranes will be positioned to the north of the rail corridor.

The cranes will be in place by the end of August 2025 and will assist in building the new Exhibition Station.

What to expect

- Tower crane components will be delivered via flatbed trucks, accessing the construction area using the Ontario Line construction entrance gate, on the east side of Dufferin Street, south of 153 Dufferin Street. Work equipment will exit using Jefferson Avenue.
- Deliveries will be supported by traffic control persons as needed to ensure safety for the community and workers on-site.
- Cranes will be placed in designated locations at-site, on pre-installed bases. The locations are identified in the map above.
- A mobile crane and other construction equipment will be on-site to assist in assembling the tower cranes, within the work zone. Other Ontario Line work will remain ongoing at the same time as the crane assemblies.
- Residents and businesses may see and hear noise from work equipment. Crews will take measures to minimize noise impacts wherever possible.
- Work may be postponed or rescheduled due to unforeseen circumstances.
- Learn more about the measures we take to keep communities safe as we build more transit connections:
