

# UPDATE: Nighttime weekday and occasional Saturday piling works at Gerrard Street East and Carlaw Avenue

**Start dates and duration:** As early as February 17, 2026 and will continue for two months

**Hours of work:**

- Weekdays, between 7:00 A.M. and 11:00 P.M.
- Occasional Saturdays, between 7:00 A.M. and 7:00 P.M.

## What is happening?

- Piling work is ongoing at the northeast corner of Gerrard Street East and Carlaw Avenue.
- To maintain the project schedule, weekday shifts will be extended until **11 p.m.**
- Work will occasionally take place on Saturdays as needed from **7 a.m. to 7 p.m.**
- These piles provide essential support for the rail corridor, enabling excavation for the future Gerrard Station.
- Nighttime work and occasional Saturday shifts will begin as early as February 17, 2026, and continue for approximately two months.
- The Gerrard-Carlaw dog park will remain open during this work.

## What to expect

- Construction equipment will enter and exit the work site using the access road off Carlaw Avenue, between Gerrard Street East and Simpson Avenue. The access road will be used to bring materials and equipment into the site.
- Where space allows, solid noise barriers (wood hoarding) will be installed around the perimeter of the site.
- A drill rig will be used to install the piles.
- Construction activities will include drilling, hauling soil, steel and rebar installations and concrete pouring.
- The drill rig will dig circular holes into the ground. Steel and rebar cages will then be inserted into the holes using a crane, before being filled with concrete to form piles.
- Secant piling is the process of overlapping piles with one another to form a solid concrete wall. This wall will be built to support the rail corridor, enabling excavation for the Gerrard Station.
- Noise and vibration from construction equipment including vibratory rollers, drill rigs, concrete trucks and other machinery can be expected.
- Noise and vibration monitors are in place to ensure acceptable levels are maintained.
- Construction equipment and materials will be properly secured within the work zones.
- Residents will notice construction crews, equipment, installation of safety hoarding and material deliveries near the construction areas shown on the image above.
- Work may be delayed due to weather conditions or unforeseen circumstances.

Drill rig

## About the project

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 transit connections, including GO, TTC, and more.
- Approximately 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
