

Update: Retaining wall and noise barrier construction along the Lakeshore East rail corridor

Hours of work:

- Monday to Friday between 7 a.m. and 7 p.m.
- Some weekend work may be required to complete critical activities. Advance notice will be provided for weekend work.

Location	T-wall installation	Noise barrier installation
Eastern Ave. to Queen St. E.	Completed	Completed
Queen St. E. to Dundas St. E.	Completed	Completed
Dundas St. E. to Logan Ave.	Resuming March 9, 2026	Starting April 2026
Logan Ave. to First Ave.	Ongoing until end of March 2026	Ongoing until end of April 2026
First Ave. to Jones Ave.	Not applicable	Completed

What is happening?

- The installation of new retaining walls and noise barriers on the west side of the rail corridor was completed between Eastern Avenue and Dundas Street East.
- Portions of the retaining wall was installed between Dundas Street East and Logan Avenue. An opening was required to maintain access to the Dundas rail bridge. With the construction of the rail bridge completed, installation of the remaining retaining wall will resume, with the installation of the noise barrier to follow.
- Retaining wall and noise barrier construction is expected to take place during the day. Retaining walls and noise barriers will be completed by May 2026

What to expect

- Excavators, trucks, compactors, loaders, skid steers and mobile cranes will be used to complete this work.
- Equipment will enter and exit the rail corridor using the access roads at Eastern Avenue and Logan Avenue.
- Construction vehicles will use main roads to travel to and from the site.
- Construction activities will include earthworks (excavation, backfilling and compaction), hauling, and installation pre-cast concrete blocks (T-walls) and acrylic noise barriers.
- Noise and vibration from construction activities can be expected.
- Mitigation measures are in place to minimize community disruption as much as possible. Monitoring instruments are in place to ensure that noise and vibration levels stay within acceptable limits.
- This work will take place within the rail corridor; no traffic or pedestrian impacts are expected.
- Construction equipment and materials will be properly secured within the work zone.
- This work may be delayed or rescheduled due to inclement weather and/or unforeseen circumstances.

About the project

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar and bus lines.
- Approximately 30 minutes from one end of the line to the other.
- 28,000 fewer cars on the road each day.
