

Lane and sidewalk restrictions for utilities relocation work on McCowan Road near Huronia Gate

Schedule: Late March to late May 2026

Hours of Work: 7:00 a.m. to 5:00 p.m., weekdays

Note: Dates may be impacted due to weather conditions or unforeseen circumstances.

What is Happening

- As part of Scarborough Subway Extension construction, crews need to relocate telecommunications and hydro lines on the east and west side of McCowan Road, north of Huronia Gate and Hurley Crescent. Three trees also need to be removed as a safety precaution.
- Metrolinx works closely with the City of Toronto and the Toronto and Region Conservation Authority on replanting trees in the area. Learn more at metrolinx.com/vegetation. All required permits have been obtained for the tree removals. Metrolinx's Vegetation Guideline specifies how many trees need to be planted when any tree is removed. The guideline is used across our network to ensure more trees are planted than removed as we carry out the largest transit expansion in the history of the region. Environmental experts will be on site to ensure the tree removal is carried out in accordance with regulatory requirements.
- This work will require a temporary lane closure and sidewalk rerouting.

What to Expect

- Relocation of the hydro and telecommunications lines will be completed in two phases, starting on the east side of McCowan Road and then moving to the west side.
- Crews will be using excavators, concrete saw cutters, and a hydro vac truck to remove the asphalt and gravel and dig a trench to relocate the hydro line.
- Residents may hear noise from this construction activity.
- There will be no telecommunications or hydro interruptions to residents or businesses as a result of this work.
- Sidewalk access will be temporarily rerouted during the work period, with fencing to delineate work areas and keep pedestrians safe.
- No driveways or intersections will be blocked during this work.
- Flaggers will be on-site to assist drivers and pedestrians.
- Work areas will be clearly marked or fenced off to ensure public safety.

About the Project

- A nearly eight-kilometre subway extension will extend Line 2 further into Scarborough.
- Three new stops will have connections to up to six other transit options, including TTC buses, GO train, GO buses, Line 5 Eglinton, Durham Region Transit, and the proposed Sheppard Extension.
- The extension will accommodate up to 105,000 daily boardings and put 34,000 more jobs within walking distance to rapid transit.
