

Borehole drilling at Mount Dennis Station

Expected start date: March 20, 2026

Expected completion: March 23, 2026

Work hours: Starting at 7:00 p.m. on March 20 until 5 a.m. on March 23, 2026

Map of work area

What is happening?

- Crews working on behalf of Metrolinx will drill one borehole approximately 40 metres deep to collect soil samples and install groundwater monitoring wells to help measure water levels.
- Crews will perform these works within the closed lane of the existing construction site in front of Mount Dennis Station.
- Overnight activities will be required to safely execute the work. Measures will be in place to reduce disruption.
- Access to Mount Dennis Station will not be affected by this work.

What to expect?

- Crews will enter through the designated construction gate, with no impact on traffic or pedestrians.
- A hydro-vac truck will expose underground utilities to a depth of three meters before drilling begins.
- A small track mounted drill rig will be used for drilling.
- Water will be used during drilling to help control dust, and equipment will not idle unnecessarily.
- Once drilling is complete, the borehole will be filled and the ground restored. The work area will be cleaned and any debris or soil will be removed.
- Work may be delayed or rescheduled due to weather conditions or unforeseen circumstances.

About the project

- The Eglinton Crosstown West Extension will bring even more rapid transit to Etobicoke and Mississauga, making it easier for people to get where they need to be each day.
- The extension of Line 5 Eglinton will run 9.2 kilometers from Mount Dennis Station to Renforth Drive. Once complete, it will create a continuous rapid transit line that stretches from Scarborough, through midtown Toronto, and into Mississauga.
