

Well decommissioning at Pape and Sammon avenues

Expected start date: Monday, April 6 and Tuesday, April 7, 2026

Hours of work: 7:00 a.m. to 7:00 p.m.

What is Happening?

- To enable further construction of the Ontario Line, crews will be undertaking well decommissioning activities in and around Pape Avenue and Sammon Avenue site.
- The work is done by accessing well casings at street level to assess internal conditions, removing pipes, and backfilling the hole.
- Ground water monitoring is an important part of underground work. To ensure that readings are accurate during work, the old water monitoring points must be sealed off.
- The work will take place over a two-day period, on Monday, April 6 and Tuesday, April 7, from 7 a.m. to 7 p.m.

What to Expect

- Nearby residents may hear noise related to the work such as a hydrovac truck, hand coring equipment, trucks and cement mixers as crews work to decommission old wells.
- Work crews will remove the casing of the wells and remove existing piping.
- Once the piping is extracted, the well hole will be filled with a strengthening filler material called bentonite, and then topped off with concrete, up to street level.
- Once the well is filled and decommissioned, crews will ensure the work area is clear of any potential hazards and debris before moving to the next location.
- Signage and safety barriers will be in place to delineate work zones.
- This work may be delayed due to inclement weather and/or unforeseen circumstances.

About the project

- 15.6-kilometre subway line that will make it faster and easier to travel within Toronto and beyond.
- 15 stops and more than 40 connections to other transit, including GO train, subway, LRT, streetcar and bus lines.
- Approximately 40 minutes from one end of the line to the other.
- 28,000 fewer car trips on the road each day.
