

Proposed Grimsby GO Station

Site Preparation Work

June 22, 2026 to August 2026

Figure 1: Map showing work area. *NOTE: Site preparation work will not affect the adjacent wood lot.

What You Need to Know

Beginning June 22, Metrolinx is expected to begin site preparation work at the proposed Grimsby GO Station located on Livingston Avenue, west of Casablanca Boulevard, south of the CN Rail Corridor.

This work is expected to continue from June to late August in preparation for future construction at the site. The adjacent wood lot will NOT be affected.

PLEASE NOTE: Timing of this work is subject to change due to weather or unforeseen circumstances.

What to Expect

Most construction activities will include but are not limited to:

- Site fencing
- Environmental protections
- Construction of access roads and laydown areas
- Topsoil stripping and stockpiling.

Community Impacts

Area neighbours and businesses may experience potential noise, vibration and dust impacts from the construction work. Metrolinx will do everything possible to mitigate and control impacts to the community.

Construction work is expected to take place primarily on **weekdays from 7am to 7pm, and on weekends as necessary** during the same period. **Critical safety work on the rail corridor will have to be completed overnight during the week and on some weekends between 7pm and 7am** to ensure rail operation safety.

On Street Parking Livingston Avenue

On street parking will be prohibited in the dead-end area of Livingston Avenue, in accordance with the Town of Grimsby Parking by-law. **Property owners in the immediate area are asked in advance to remove parked vehicles from Livingston Avenue during construction.** Note: not all parking By-laws are posted on signs within the Town of Grimsby.
