

Watermain Work at Queen and Yonge Streets

Expected start date: As early as August 4, 2026

Expected duration: Up to 3 months

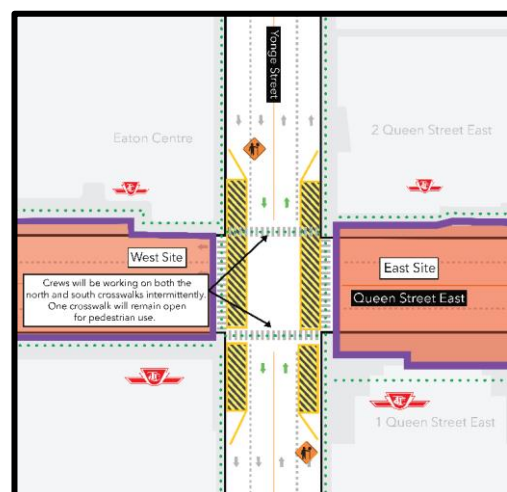

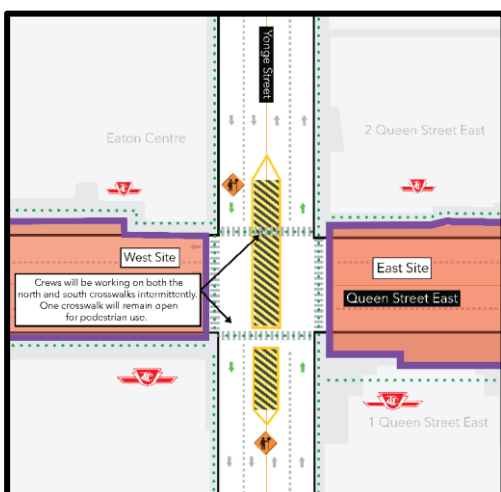

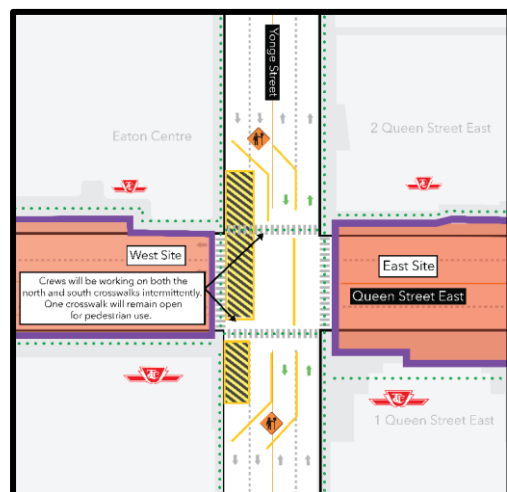

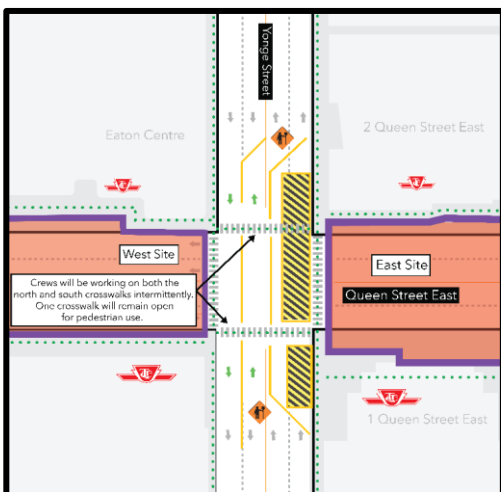

Hours of work: Weekdays, 7:00 A.M. to 5:30 P.M.

What is happening?

- Crews will perform utilities services for the future Ontario Line station at Queen, including replacement of watermain valves.
- The work will take place in different phases and areas of the intersection, as access to different areas of the watermain is required.
- Vehicular traffic lanes will be temporarily reduced while work is in progress.

What to expect

- Work is scheduled to begin as early as August 4, 2026, and is expected to take approximately three (3) months to complete.
- Crews are expected to work Monday through Friday between 7:00 A.M. and 5:30 P.M.
- Pedestrian access will be maintained in all directions during this work.
- Vehicle traffic will be directed around the worksite, with temporary lane reductions in place. Traffic will be shifted to accommodate the specific area of work underway, as highlighted in the maps below.

- Traffic signs will be installed all along the work perimeter to signal the work zone.
- All lane reductions are temporary and intermittent; the area will only be closed while crews are completing the specific areas. The area will be returned to public traffic use upon completion of the phase of work.

- Flag personnel will be on site to safely direct pedestrian and vehicle traffic around the work zone, as required.
- Some properties located close to the work zone may experience a temporary disruption of water services. These impacts will be temporary and intermittent during the duration of the work. Properties anticipated to experience a water service disruption will be contacted in advance closer to the date of impact, as needed.
- Area residents and businesses can expect to hear noise from work equipment, specifically hydrovac trucks or drills, as required to assess underground utilities and ground conditions. Crews will take measures to minimize noise impacts wherever possible.
- Access to adjacent properties will always be maintained or will be accommodated.
- Transit services will be maintained. No disruptions are expected from this work.
- After each shift, each work site will be securely covered and marked for safety until workers return the next working day.
- Work may be postponed or rescheduled due to unforeseen circumstances.
- Crews will occasionally return to the work zones after this work is completed to perform maintenance on installed devices.
