

# Grimsby GO – Construction Site Mobilization

## September 2026

Map shows the approximate extent of the work area

### What to expect

Beginning September 14, 2026, Metrolinx contractors will set up the site compound for the construction of Grimsby GO Station. Site trailers and storage containers will be delivered to the site.

From September 21, 2026, aggregate materials - e.g. small rocks, stones and sand - will be delivered for development of the site in preparation for building the new GO station. There will be numerous construction vehicles using Casablanca Boulevard and Livingstone Avenue. **Current on-street parking restrictions will remain in place.**

A site-specific traffic safety plan will be in place at the Grimsby GO construction site and will include signage and controlled access.

### Hours of work

- 7:00 a.m. – 5:00 p.m. **NOTE:** There will be some weekend work and overnight activities at the site.

### Pedestrian access

- Many vehicles will be accessing the site. Please be cautious when walking/cycling on local roads.

### Lighting

- Lighting at the worksite may be visible
- When possible, lights will be positioned away from residential homes.

### Dust

- Stone delivery and construction equipment may generate dust during construction.

### Traffic changes

- While traffic disruptions are not expected, there may be an increase in construction-related traffic on local roads.

### Noise & vibration

- Area residents and businesses may experience noise and vibration caused by construction equipment at the site.

### About the project

Grimsby GO Station will be a new stop on the Lakeshore West line, located west of Confederation GO Station, expanding rail access for residents across the Niagara region. The station will provide more customer options and increase onboard capacity in addition to the existing GO bus service available at the Casablanca/QEW Park & Ride. Grimsby GO will help reduce congestion and reliance on personal vehicles by eliminating the need for residents to drive up to 30 minutes east or west to reach the nearest GO station.
