

Installation of monitoring devices between King West and Chinatown Stations

Expected start date: Oct. 2, 2026
Expected end date: Mid-October 2026
Hours of work: 9 p.m. to 5 a.m.

What is happening?

- Crews are installing monitors and investigating underground utilities around the **King West and Chinatown** Ontario Line construction sites, as indicated in the area shown in yellow on the map below. This work is required to monitor ground conditions for future Ontario Line tunnelling.
- Monitors will be installed underground and are expected to stay in place until the project is complete, with crews occasionally revisiting for testing and inspection.
- Temporary lane and sidewalk closures are required to carry out this work safely.

What to expect

- The work is scheduled to begin as early as **Friday, Oct. 2, 2026**, and is expected to be completed **by mid-October 2026**.
- Residents and businesses may hear noise from hydrovac trucks or drills during utility and ground assessments. Crews will minimize noise impacts where possible.
- All work closures are temporary, occurring only while crews are working. Once the monitoring device installation is complete, the area will reopen to the public. Traffic control persons will be present on-site to safely direct traffic around the work zone.

Map of work

- Traffic will be maintained in all directions.
 - Signage will be posted advising of closures and restrictions.
 - Access to adjacent properties will always be maintained or will be accommodated.
 - Transit services will be maintained.
 - After each work shift, each area will be securely covered and marked for safety until workers return or the work is complete.
 - Work may be postponed or rescheduled due to unforeseen circumstances.
 - Crews will return to the work zones in the future to perform maintenance on devices.
