What is Happening?

As part of improvements being made to the Barrie line, crews will be conducting grouting works within the rail corridor near Prescott Avenue (see Figure 1).

This work will occur over a weekend service pause of the Barrie GO rail line, allowing crews to work safely on the track without live trains passing through.

What to Expect?

- Construction lighting may be visible from the work site.
- Where possible, lights from equipment will be positioned away from residential homes to keep light pollution levels low.
- No additional dust is expected in the area.
- No utilities disruptions are anticipated.
- No impact on driveway access in the construction area.
- Increased presence of construction vehicles and equipment can be expected in the work area.
- Work areas will be clearly marked or fenced off to ensure public safety.
- Please exercise caution around active construction sites.
- There will be no impact from hauling or trucks.

Traffic Changes

- No disruptions to traffic are anticipated.

Pedestrian Access

- All pedestrian sidewalks will remain open throughout the work.

Noise & Vibration

- Residences and businesses in the area may experience intermittent noise and vibration caused by construction equipment related to this work.
- Crews will take measures to minimize disruptions to the surrounding area wherever possible.
- Trucks accessing the site will be equipped with broadband backup alarms, which emit a less disruptive sound compared to traditional beeping backup alarms.

Transit Service

- Please visit the [GO Transit](https://www.toronto.ca/go-transit) website for more information regarding service impacts on the Barrie line over the weekend.

About the Project

The project includes modifications and upgrades to the existing rail corridor, that will allow for a second set of tracks to be installed. The project area is within the City of Toronto between King Street West and Steeles Avenue West. This work will pave the way for future two way, all-day GO train service on the Barrie Line.
