Planned Construction – Six-Month Look Ahead

With the population across GO Transit's service area, which includes the Greater Toronto and Hamilton Area (GTHA), Kitchener-Waterloo, Barrie, and Niagara, expected to reach 15 million by 2051, improving transit service is essential to reducing congestion and providing a more attractive alternative to driving.

Metrolinx is expanding the GO network to meet this growing demand by delivering faster, more frequent train service through new infrastructure and operational improvements that reduce travel times, increase capacity, improve reliability, and enhance customer experience.

This document will provide a 6-month look ahead of all planned construction across the GO network. Please be advised that all information captured below is subject to change based on operational requirements, approvals, or unforeseen circumstances.
