Scarborough Subway Extension

Construction Notice

Start of major excavation at McCowan Road and Progress Avenue

Scheduled start date: November 4, 2026
Scheduled end date: November 18, 2026
Working hours: Weekdays, 6:30 a.m. to 2:30 p.m.

Map showing area of construction and increased truck presence

What Is Happening

Excavation is underway at the future Scarborough Centre subway station, near McCowan Road and Progress Avenue. You may notice, over the next two weeks, an increase in truck traffic in the area as we move excavated soil off site. Excavation will continue, and truck traffic can be expected to ebb and flow, beyond this initial two-week period.

Being mindful of our neighbours, we have established dedicated haul routes for the trucks to ensure we avoid residential areas as much as reasonably possible (see map, above). Additionally, dust mitigation measures are in place to reduce dust and dirt outside of our works site.

General

- Increased presence of construction vehicles and equipment can be expected in the work area.
- Work areas will be clearly marked or fenced off to ensure public safety.
- Work may be delayed or rescheduled due to weather or unforeseen circumstances.

Dust

- Trucks and construction equipment may generate dust during construction.

Hauling

- Approximately 100 trucks will leave the site each day
- Trucks entering the site will come from highway 401 and travel south on Consilium Place
- Trucks leaving the site will travel north on Consilium Place and then turn right on McCowan Road.
- Trucks will stage inside the work site and will not stage outside of the site boundaries.

Traffic Impacts

- Minor delays may be experienced near the work zone.
- Two-way directional traffic will be maintained during the work.

Noise & Vibration

- Residences and businesses in the area may experience noise and vibration caused by construction equipment related to this work.
- Crews will take measures to minimize disruptions to the surrounding area wherever possible.

Pedestrian Access

- Clear and defined walking paths will be maintained during construction to ensure pedestrian safety.

Transit Service

- There is no anticipated impact to transit services.

About the Project

A nearly eight-kilometre subway extension will extend Line 2 further into Scarborough. Three new stops will have connections to up to six other transit options, including TTC buses, GO train, GO buses, Line 5 Eglinton, Durham Region Transit, and the proposed Sheppard Extension. The extension will accommodate up to 105,000 daily boardings and put 34,000 more jobs within walking distance to rapid transit.
