What Is Happening?

As part of state of good repair maintenance work, Metrolinx will be rehabilitating track infrastructure at the Kennedy Rd S level crossing in Markham. This work includes removing the existing crossing surface, replacing and reinstalling crossing components and track infrastructure as required, and completing final asphalt paving. To safely complete this work, this work will be happening over the weekend when trains are not operating.

Information as of: October 30, 2026

METROLINX

What to Expect?

- Construction lighting may be visible from the work site.
- Trucks and construction equipment may generate dust during construction.
- Crews will take precautions to monitor and reduce dust.
- Increased presence of construction vehicles and equipment can be expected in the work area.
- Work areas will be clearly marked or fenced off to ensure public safety.
- Please exercise caution around active construction sites.
- Work may be delayed or rescheduled due to weather or unforeseen circumstances.
- Approximately 5 trucks will leave the site each day to move materials overnight. In certain circumstances, trucks may need to operate during the day.
- Please note that the information contained in this notice is preliminary and subject to required permit approvals.

Traffic Changes

- Kennedy Road South will be closed for the duration of the work. Signage will redirect traffic around the work zones.

Pedestrian Access

- Temporary sidewalk closures or pedestrian detours will be in place while the work is underway, with signs in place to direct pedestrians as needed.

Noise & Vibration

- Residences and businesses in the area may experience noise and vibration caused by construction equipment related to this work.
- Crews will take measures to minimize disruptions to the surrounding area wherever possible.

Transit Service

- Please visit GOTransit.com for more information about changes to your travel.

About the Project

- Critical State of Good Repair projects collectively aim to ensure the safety and reliability of Metrolinx's rail network, as well as mitigate potential service disruptions and improve on-time performance, customer satisfaction and passenger comfort. This work will extend the lifespan of essential infrastructure by reducing the need for frequent maintenance intervention.
